

WORKING WELL

Clean water.
Well protected.

County of Wetaskiwin

Presents

Working Well Workshop

Tuesday March 20, 2018 6:00 – 9:30 pm

Falun Community Hall 272019 - Highway 13

Consider how your life would change if you lost your water supply!

Did you know that a poorly maintained water well can put your water supply at risk of contamination and reduce your well yield?

If you are one of 450,000 Albertans who use their water well for household purposes, the key to ensuring your water supply is safe and secure is to know how groundwater works, learning about your well and understanding how to properly maintain it.

Proper water well siting, construction, maintenance and plugging will help protect your well from biofouling and contamination, save you costly repairs, and ensure your well water yields are sustained over many years.

Find out what you can do to protect your well. Attend the **FREE water well management workshop** being hosted by **County of Wetaskiwin** and presented by the **Working Well Program**, with technical expertise provided by **Alberta Agriculture and Rural Development** and **Alberta Environment and Sustainable Resource Development**.

During the workshop we will cover:

- Groundwater – how it works
- Water quality and quantity testing
- Well protection – protecting your well from contamination
- Basic well maintenance
- Water sampling – how to do it

To attend the workshop, please **pre-register** by calling Heather at the **County of Wetaskiwin** Office . We will require your legal land description in order to retrieve your water well report from the Alberta Water Wells Groundwater information site.
