

GWYNNE TRUCK FILL INSTRUCTIONS

Step 1 ~ Connect water fill hose to the tank.

This is the main display screen you will see.

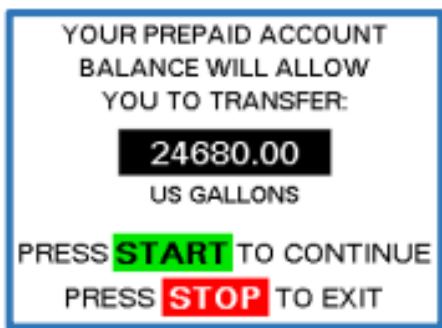

Step 2 ~ Choose your hose and press **ENTER**.

#1 – North hose

#2 – South hose

Step 3 ~ Enter your four-digit access number (assigned to you by the County) and press **ENTER**.

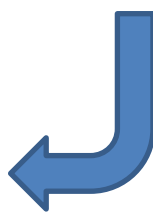

Step 4 ~ Enter your 4-digit PIN number and press **ENTER**.

A message displays your account balance and the maximum amount of water you can dispense.

****Note: 1 cubic meter = 220 imperial gallons****

Step 5 ~ Enter the volume of water you want, and press **ENTER**.

Step 6 ~ Confirm that the hose is connected, and press **ENTER**.

Step 7 ~ Press **START** to start the water flow. The transferred water volume is displayed on the screen and will automatically stop dispensing when the requested volume is reached.

There will be a slight delay before water engages.

You can press **STOP** anytime to stop water flow

Step 8 ~ After water flow has stopped, you may disconnect hose and transaction is complete.
